## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-29, drawn to expression of nucleic acids using an epsilon cyclase promoter in bacteria, yeasts and fungi.

Group II, claim(s) 1-29, drawn to expression of proteins using an epsilon cyclase promoter in bacteria yeasts and fungi.

Group III, claim(s) 1-29, drawn to expression of nucleic acids using an epsilon cyclase promoter in animals.

Group IV, claim(s) 1-29, drawn to expression of proteins using an epsilon cyclase promoter in animals.

Group V, claim(s) 1-29, drawn to expression of nucleic acids using an epsilon cyclase promoter in plants.

Group VI, claim(s) 1-29, drawn to expression of proteins using an epsilon cyclase promoter in plants.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Epsilon cyclase promoter regions were known in the art; Giuliano *et al.* teach the 5' untranslated and promoter region of the *Arabidopsis* lycopene epsilon cyclase gene in GenBank Accession AF117257 published 7/12/2000; see nucleotides 1-925.

Art Unit: 1638

The claims are directed to 3 independent and distinct nucleic acid sequences of SEQ ID NO: 1, 7 and 8 and nucleic acids encoding amino acids of SEQ ID NO: 17 to 22 and nucleic acid sequences SEQ ID NO: 23, 25, 27, 29, 31, 35, 37, 39, 41, 43 and 45. Upon election of Group I-V or VI, Applicant is required to elect a single nucleic acid sequence SEQ ID NO: 1, 7, or 8; an amino acid of SEQ ID NO: 17-21 or 22; and a nucleic acid sequence of SEQ ID NO: 23, 25, 27, 29, 31, 35, 37, 39, 41, 43 or 45. This requirement is not to be construed as a requirement for an election of species, since each of the nucleic acid sequences or amino acid sequences recited in alternative form is not a member of a single structurally and functionally related genus, but rather constitutes an independent and patentably distinct invention. Separate searches and considerations would be required for examination of each of the nucleic acid sequences.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1638

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
